Project Feasibility

Before full-scale implementation, it helps to identify resources and estimate the space, Cap-Ex & Op-Ex requirements.

Concept Engineering

Shaping raw ideas into actionable concepts through analysis, refinement, and innovation for practical implementation.

Basic Engineering

It involves further refinement such as preparation of tentative BOQs, schematic layout, equipment placement drawing, etc.

Detail Engineering

This overlooks further details such as preparation URS/TS, routing drawings, PIDs, detailed BOQ, project costing, etc.

Architectural Services

It looks after designing of site master layout, facade designing, 3D views, walkthroughs, shear wall detailing, interior designing, etc.

Structural Design

It focuses on complete infrastructure such as PEB/RCC structure design, road & gutter design, underground/overhead storage tank, etc.

Turnkey Contracting

Modular Cleanroom Panels

This includes SITC of wall/ceiling/riser panel, doors, interlocks & view glass, coving & 3D profiles, passbox, etc.

Heating, Ventilation & Air Condition

This includes SITC of HVAC low side such as AHU, ducting & insulation, ADPs, copper & drain piping, etc.

Electrical System

This includes SITC of transformer & DG, main LT & distribution panels, earthing & wiring work, access control & CCTV.

Mechanical & Utility Piping

This includes SITC of chiller, compressor, boiler, hot water generator, cooling tower, pumps and associated piping work.

Plant Automation

This includes monitoring & controlling of building & environment parameters through instruments, sensors & centralized system.

Laboratory Piping

This includes SITC of lab furniture, instruments, gas piping, exhaust ducting for R&D/ QC/ Micro/ BSL labs.
